Health Sciences & Biology

Jury Evaluation Criteria

(**Junior vs Senior** – Gold : 100 – 91 / Silver: 90-81 / Bronze: 80-65)

Criterion	Junior Points	Senior Points
Original Idea / Innovation (Is the idea new or an improved version of an existing concept in health sciences or biology?)	20	15
Presentation Techniques (Do students demonstrate strong understanding of the project? Are scientific and biological concepts explained clearly? Are language skills effective? Is the presentation well-structured? Are questions answered satisfactorily?)	20	15
Poster & Table Design (Are required sections included as shown on the website? Are data, charts, biological models, or experimental setups clearly presented? Is the table informative and well-prepared with relevant materials?)	15	10
Implementation / Realization (How well has the idea been realized? Is there an experiment, model, or biological study? Does it function or produce reliable results? Is there visible effort and development?)	10	15
Methodology / Process (The evaluation focuses on how the project was planned and conducted, including time investment, appropriate scientific methods, control of variables, and ethical and safety considerations.)	10	10
Scientific / Creative Quality (The evaluation focuses on the quality of outcomes, including biological accuracy, data analysis, interpretation, and whether experimentation was conducted, appropriate to the student's level.)	10	15
Impact / Relevance (Does the project address real-world health or biological issues? Does it provide medical, societal, or scientific value? Does it contribute to solving a relevant problem? Future development plan)	15	15
